

Formularus New Edition Service

Hamburg, March 10th, 2021

Formularus-Verlag introduces the NES New Edition Service, offered since May 2020. The NES is to be found on the Formularus-Website in der "Service"-section.

Customers have direct access to our "**New Edition Service**"-pages, either by visiting our website or by subscribing to our **RSS-Feed**. By using the NES, customers are able to see with a mouse-click, whether New Editions require the purchase of new books or if previous **editions** may be kept in use when certain conditions are fulfilled.

Therefore, our products are branded with an item number, e.g. "133". Updated editions have the item number, the year of publishing and the current number of changes applied within that year, e.g. "133-21-2". This number will be printed on our books and is to be found in the NES.

The NES provides a short message describing the current updates and, if necessary, the date when relevant changes are entering into force.

An introduction to the NES is to be found under "**Service**" → "**New Edition Service**" → "**Information on New Edition Service**".

On our website you will find the details for every book with a click on "**Logbooks**", from where you may choose the relevant copy. A history of the updated editions can be found underneath the flip pages for every log- and record book. With a click on your RSS-Message you will be guided automatically to this page as well.

Please scroll down on this side to find guidance for the subscription to our RSS-feed, using "**Thunderbird**". The procedure for installation in "**Outlook**" is very similar to "**Thunderbird**". Guidance for other browsers is available in the internet.
